

# THUNDER

# PVC DRY BAG

## Keep your valuables safe and dry on water adventures

### Specifications

The Thunder dry bag can be used to store and keep your gear dry in any type of wet environment. It is made from a heavy duty, durable PVC tarpaulin material and produced with an Electronic Seam Welding system, which electronically welds the material at molecular level into a seam that is extremely strong.

A reinforced top lip increases the effectiveness of the seal by squeezing out the trapped air when folding and sealing the bag.

**NOTE:** This product is not suitable for prolonged submersion.

### Features and Benefits

- |  |                                      |
|--|--------------------------------------|
| ■ 35L capacity   | ■ Multi-purpose storage applications |
| ■ Tough welded seams                                     | ■ Perfect for outdoor activities     |
| ■ Folding lock system                                    | ■ Shoulder strap included            |
| ■ Heavy duty and durable material for extreme conditions | ■ Easy to use                        |

### How to Operate

1. Place your belongings in the bag and leave around 1/2 to 1/3 of the bag empty. Do not overfill the bag as this will leave less space for closing which may cause leakage.
2. Fold over the reinforced top lip (see Fig 1).
3. Squeeze out the trapped air as much as possible (see Fig 2).
4. Roll the neck tightly around the fasteners at least 3-4 times. Connect the buckles at the top of the bag together to create the seal and carry handle (see Fig 3).

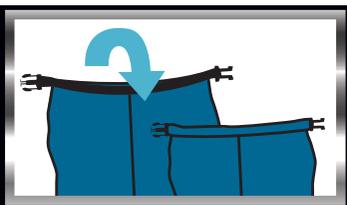

Fig 1. Fold reinforced top lip once as indicated

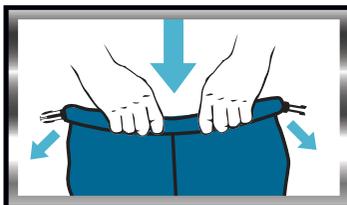

Fig 2. Push down to force excess air out

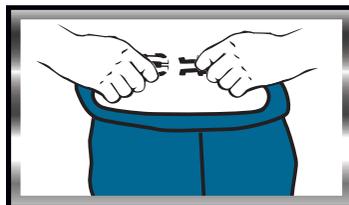

Fig 3. Roll down three more times and clip the buckles to close

### Storage Instructions

1. Wipe off any dirt and leave to dry in a dry place away from direct sunlight.
2. Clean with soapy water and leave to dry fully. Do not use any chemical cleaners.
3. Store in a cool ventilated area.

Please follow instructions; incorrect usage will not prevent water from entering the Thunder Dry Bag.

Do not use with expensive personal belongings or electronic equipment e.g. cameras, mobile phones etc.

Contents are not covered by any guarantee against damage or flooding.

**WARNING:** The Thunder Dry Bag is not suitable for diving or for use as a floatation device.
